### *Our Inventory Solutions Make Managing Easy*

Inventory is one of the more visible and tangible aspects of doing business. In a literal sense, it's your stock of what you need to conduct business. We know inventory represents a large portion of your business investment. For this reason, we believe it has to be managed in the most efficient way possible to maximize profits.

Our Inventory Management solutions can help you reach your business goals and see a greater return on investment. We've developed software for a variety of service contractors including electrical, plumbing, heating, ventilating and air conditioning. Our solutions have allowed them to manage their business right down to the 'nuts and bolts' of their business.

### *Inventory Management Solutions*

#### **Inventory Management and Barcoding Solutions**

One of the greatest costs you have is your inventory and you need the right tools to manage it intelligently. Our solutions will help you maximize purchasing and production efficiently, improve customer service, and actually minimize your inventory investment.

#### **Order Tracking Systems**

If you work with vendors, you want the most efficient processes available. We have extensive experience creating efficient purchase requisition systems, tools that generate purchase orders from them, tracking and payment systems, and fully automated vendor information centers.

#### **Asset Tracking and Management Systems**

Do you need to control and manage your fixed and mobile assets? Our custom solutions will help you identify your assets, know where they're at, who uses them, and all costs associated with them. Our solutions can integrate barcoding and RFID technologies too.

*"We help businesses **know and control** all aspects of their organization - from **wrenches** to **work orders**."*
